

**Introduction to MATLAB<sup>®</sup>  
with Numerical Preliminaries**

# **Introduction to MATLAB<sup>®</sup> with Numerical Preliminaries**

**Alexander Stanoyevitch**

**John Wiley & Sons, Inc.**  
*Publishers Since 1807*

# Contents

<b>Preface</b>	<b>vii</b>
<b>Chapter 1: MATLAB Basics</b>	<b>1</b>
1.1: What Is MATLAB?	
1.2: Starting and Ending a MATLAB Session	
1.3: A First MATLAB Tutorial	
1.4: Vectors and an Introduction to MATLAB Graphics	
1.5: A Tutorial Introduction to Recursion on MATLAB	
<b>Chapter 2: Basic Concepts of Numerical Analysis with Taylor's Theorem</b>	<b>23</b>
2.1: What Is Numerical Analysis?	
2.2: Taylor Polynomials	
2.3: Taylor's Theorem	
<b>Chapter 3: Introduction to M-Files</b>	<b>45</b>
3.1: What Are M-files?	
3.2: Creating an M-file for a Mathematical Function	
<b>Chapter 4: Programming in MATLAB</b>	<b>57</b>
4.1: Some Basic Logic	
4.2: Logical Control Flow in MATLAB	
4.3: Writing Good Programs	
<b>Chapter 5: Floating Point Arithmetic and Error Analysis</b>	<b>85</b>
5.1: Floating Point Numbers	
5.2: Floating Point Arithmetic: The Basics	
*5.3 <sup>1</sup> : Floating Point Arithmetic: Further Examples and Details	

---

<sup>1</sup> An asterisk that precedes a section indicates that the section may be skipped without a significant loss of continuity to the main development of the text.

<b>Chapter 6: Rootfinding</b>	<b>107</b>
6.1: A Brief Account of the History of Rootfinding	
6.2: The Bisection Method	
6.3: Newton's Method	
*6.4: The Secant Method	
*6.5: Error Analysis and Comparison of Rootfinding Methods	
<b>Chapter 7: Matrices and Linear Systems</b>	<b>143</b>
7.1: Matrix Operations and Manipulations with MATLAB	
*7.2: Introduction to Computer Graphics and Animation	
7.3: Notations and Concepts of Linear Systems	
7.4: Solving General Linear Systems with MATLAB	
7.5: Gaussian Elimination, Pivoting, and LU Factorization	
*7.6: Vector and Matrix Norms, Error Analysis, and Eigendata	
7.7: Iterative Methods	
<b>Appendix A: MATLAB's Symbolic Toolbox</b>	<b>285</b>
<b>Appendix B: Solutions to All Exercises for the Reader</b>	<b>293</b>
<b>References</b>	<b>323</b>
<b>MATLAB Command Index</b>	<b>327</b>
<b>Index</b>	<b>329</b>
